About the International Webinar

"Impact of Digital Threats and Cyber Risk during Covid-19"

The pandemic Covid-19 has created an enormous challenge worldwide before Schools, Colleges, Offices, Organizations and other facilities to continue their operations despite massive shutdowns. The information technology on which their functioning depends are the data centres, cloud systems, departmental servers and digital devices. Many of us are now working remotely, students are attending classes virtually and our reliance on social media and social networks to stay connected has definitely increased as we define the 'new normal' in our lives.

Overnight, the demand placed on the digital infrastructure has skyrocketed. Such high degree of dependence on technology also makes it a much bigger and more lucrative target for cyber criminals.

Therefore, cybersecurity efforts need to be upgraded to prevent a second crisis from emerging for the digital devices and networks that have become infinitely more vital in recent months.

During this webinar, our cybersecurity experts will discuss different ways that can provide clear visibility into cybersecurity risks by proactively identifying, prioritizing and remediating cyber risks, frauds and misinformation construed by cyber criminals and hackers.

This Webinar will provide an overview of the heightened technology risks around the world from cyber-attacks as well as the factors driving them.

Objectives:

- To identify the key measures to reduce risks and prevent cyberattacks.
- To review the upcoming challenges for new cyber security during Covid-19.
- To understand the means of identifying phishing attacks
- To learn about the best practices adopted in the field of cyber ethics, cyber psychology, cyber forensic and cyber-crime through real-life case studies
- To gain an understanding of Cyber security laws and insurance.

No Registration Fee

E-Certificates will be provided to those who attend both the days of the Webinar

Webinar Committee

Patron

Dr. Sr. Pearl

Principal

Sophia Girls' College, Ajmer (Autonomous)

Convener

Mr. Gautam Chaturvedi

Head,

Department of Computer Science

Organising Secretary

Dr. Ritu Bhargava

Assistant Professor

Department of Computer Science

Organising Committee

Mr. Jeetendra Mistry, Dr. Neha Sharma, Mrs. Kiran Bhagnani, Mr. Rishi Saxena

Our Esteemed Speakers

Prof. Pastor Reglos Arguelles Jr
Dean, College of Computer Science
University of Perpetual Help,
Molino Campus, Philippines

Dr. Sujala D. Shetty
Assistant Professor
Department of Computer Science
BTTS Pilani, DUBAI Campus.

Dr. K. Chandra Sekharaiah
Professor
Department of Computer Science
& Engineering JNTUH College of Engineering,
Pedapalli, Telangana

Dr. C. B. Sharma
Retd. TPS & CEO,
DR CBS Cyber Security Services,
Jaipur

Dr. Rachna Katta Khandelwal
Associate Professor
Mahaveer Law College, Jaipur

Dr. Priyanka Sharma
Dean, Research & Publications
Professor (IT) and
Director (Research & Development),
Raksha Shakti University, Gandhinagar,
Gujarat
